
Efficiency and reliability in versatile applications.

The complete product range of water applications

Edition 2023

BELIMO

Table of contents

4

Zone valves

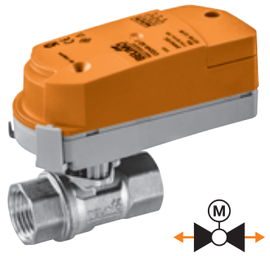
Maximum comfort, minimum consumption

Characterised control valve (QCV)	Internal thread	2-way	PN 25	DN 15...25	6
Changeover ball valve (QCV)		3-way			7
Characterised control valve (QCV)	External thread	2-way		DN 15/20	8
Changeover ball valve (QCV)		3-way			9
Pressure-independent characterised control valve (PIQCV)	Internal thread	2-way	PN 25	DN 15...25	10
Pressure-independent flow limiter valve (PIFLV)					11
Characterised control valve	Internal thread	6-way	PN 16	DN 15	12
				DN 15...25	13
Electronic pressure-independent characterised control valve (EPIV)				DN 15/20	14
Energy manifold				2...12 zones	16

Please refer to the data sheets or notes for project planning for further technical data to be observed.

DN 15...25

Field of use	Closed water circuit (pH >7)
Fluid temperature	2...90°C
Pipe connection	Internal thread Rp (ISO 7-1)
Leakage rate	Air-bubble tight, leakage rate A (EN 12266-1)
Flow characteristic	Equal percentage
Close-off pressure	Δp_s: 520 kPa
Max. differential pressure	Δp_{max}: 280 kPa
Permissible operating pressure	p_s: 1600 kPa



Suitable actuators	Nominal torque	Open/close	3-point	Modulating (2...10 V)	Modulating (0.5...10 V)	MP-Bus communication	BACnet communication	Modbus communication	Fail-safe	Nominal voltage AC/DC 24 V AC 230 V	Running time motor 90°	Actuator type	PN 25 DN 15 k_{vs} [m³/h]	DN 15 Valve type	DN 20 k_{vs} [m³/h]	DN 20 Valve type	DN 25 k_{vs} [m³/h]	DN 25 Valve type

[1] Running times, control signal, stroke limitation and other functions for MP types can be adjusted with PC-Tool or Service-Tool ZTH EU (delivery condition: modulating, operating range 2...10 V).
[2] For DN 15 only recommended with H610S and H611S.

[3] The fail-safe position NC/NO or all fail-safe actuators can be adjusted on the actuator. Delivery condition: Actuator spindle retracted. Closing point of the globe valves H..R is at top (valve stem extended).
[4] As a diverting valve, the maximum values are reduced to a quarter.

Subject to technical modifications

Subject to technical modifications

DN 40...150

Field of use	Closed water circuit and steam circuit in the subcritical range (pH >7)
Fluid temperature	5...150°C (120°C to p_S 1600 kPa, 150°C to p_S 1400 kPa)
Pipe connection	Flange PN 16 (ISO 7005-2)
Leakage rate	Max. 0.05% of k_{VS} value
Flow characteristic	Equal percentage

[1] Running times, control signal, stroke limitation and other functions for MP types can be adjusted with PC-Tool or Service-Tool ZTH EU (delivery condition: modulating, operating range 2...10 V).
[2] Actuators LV..A.. possible only on valves H6..
[3] The fail-safe position NC/NO or all fail-safe actuators can be adjusted on the actuator. Delivery condition: Actuator spindle retracted. Closing point of the globe valves H..R is at top (valve stem extended).

[1] Running times, control signal, stroke limitation and other functions for MP types can be adjusted with PC-Tool or Service-Tool ZTH EU (delivery condition: modulating, operating range 2...10 V).
[2] For DN 15 only recommended with H610S and H611S.
[3] The fail-safe position NC/NO or all fail-safe actuators can be adjusted on the actuator. Delivery condition: Actuator spindle retracted. Closing point of the globe valves H..R is at top (valve stem extended).

1) Running times, control signal, stroke limitation and other functions for MP types can be adjusted with PC-Tool or Service-Tool ZTH EU (delivery condition: modulating, operating range 2...10 V).
2) The fail-safe position NC/NO or all fail-safe actuators can be adjusted on the actuator. Delivery condition: Actuator spindle retracted. Closing point of the globe valves H..R is at top (valve stem extended).

[1] These products are also available as IP66 variant with protective housing.
[2] 30...120 s parametrisable with the Belimo Assistant App (NFC)
[3] Parametrisable with the Belimo Assistant App (NFC)
[4] Linkage is only required in combination with a PR actuator.

Subject to technical modifications

DN 350...700

Field of use	Closed and open water circuit (pH >7)
Fluid temperature	–20...120°C
Pipe connection	Flange (ISO 7005-2 and EN 1092-2)
Leakage rate	Tight, leakage rate A (EN 12266-1)
Permissible operating pressure	p_S: 1600 kPa

Suitable T-pieces

Spheroidal graphite cast iron with fastening screws

[1] For changeover applications. The maximum flow speed of 4 m/s may not be exceeded in the changeover butterfly valve.
[2] Parametrisable with the Belimo Assistant App
[3] 30...120 s parametrisable with the Belimo Assistant App (NFC)
[4] T-piece is not included in scope of delivery.
[5] The necessary fastening screws and nuts are included in the scope of delivery.

Definitions

Formula symbol

k_v The flow coefficient k_v [m³/h] is the specific volume flow of a valve with a defined delay angle with reference to 100 kPa (1 bar).
The k_v value changes, depending on the valve position.
The flow coefficient is determined for a water temperature of 5…40°C.

k_{vs} The kv value in reference to the nominal delay angle is referred to as the k_{vs} value. The nominal delay angle defines the maximum valve opening and is specified by the manufacturer.
Characterised control valve (CCV):
Flow coefficient at 100% valve opening (90° angle of rotation)
Zone valve (QCV):
Flow coefficient with corresponding position of the end stop clip (variable)
Globe valves:
Flow coefficient at 100% valve opening
Butterfly valves:
Flow coefficient at 60% valve opening for control application

$$k_{vs} = \frac{V'_{100}}{\sqrt{\frac{\Delta p_{v100}}{100}}}$$

Δpv_{100}	[kPa]
V'_{100}	[m³/h]
k_{vs}	[m³/h]

k_{vmax} Flow coefficient for 100% opened butterfly valve for open/close and changeover application.

V'_{nom} Maximum possible flow rate of a pressure-independent valve, catalogue value, delivery condition.

V'_{max} Set maximum flow of a pressure-independent valve with the greatest control signal, e.g. 10 V.

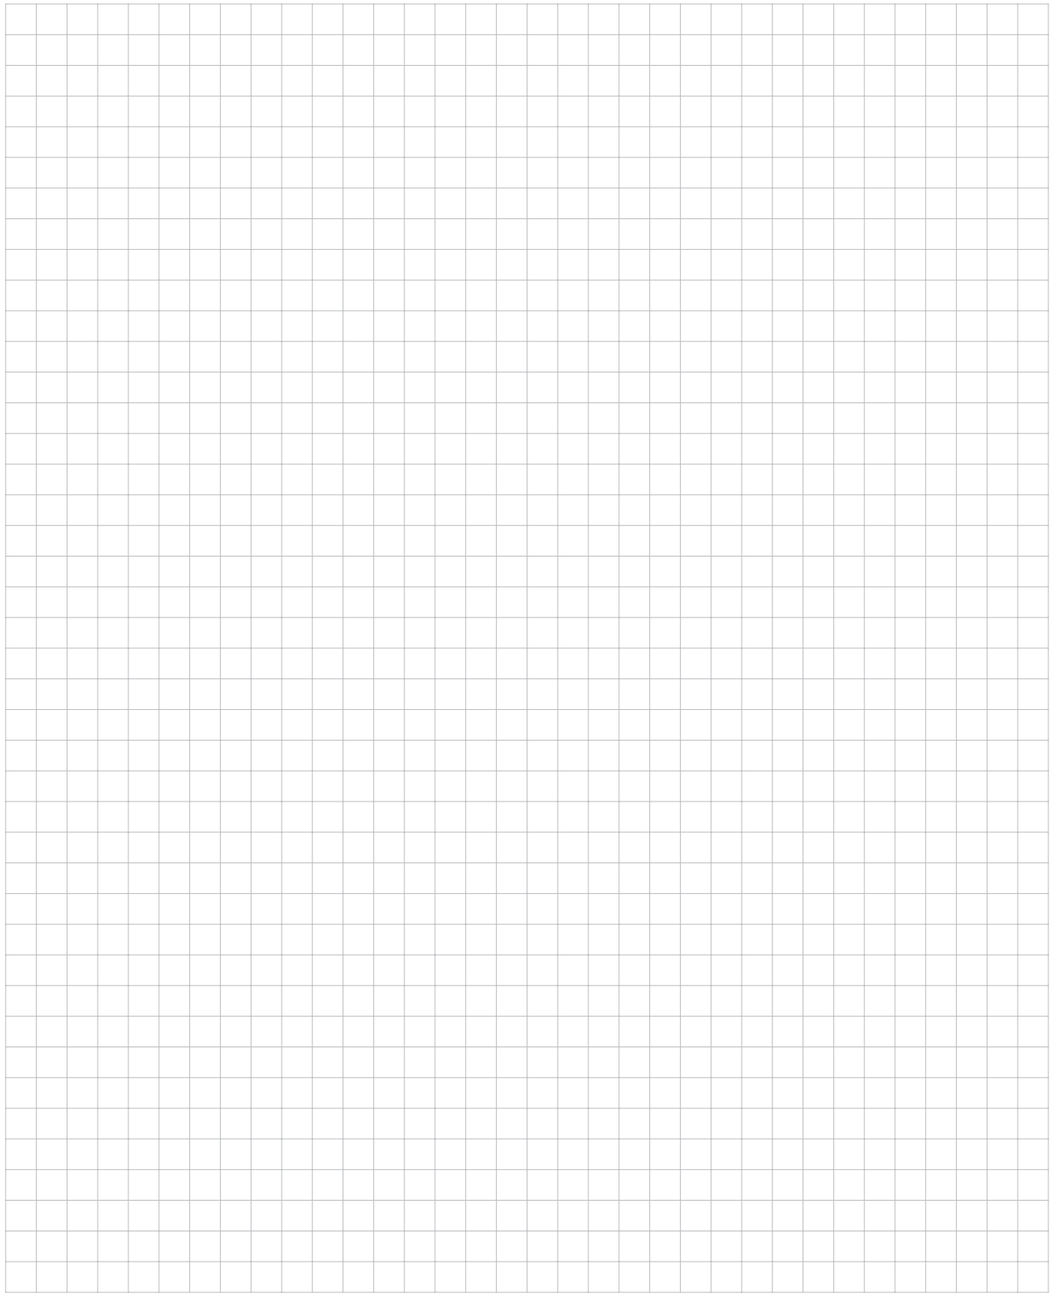
Δp_{max} Maximum permissible differential pressure for long service life across control path A – AB, with reference to the whole opening range.

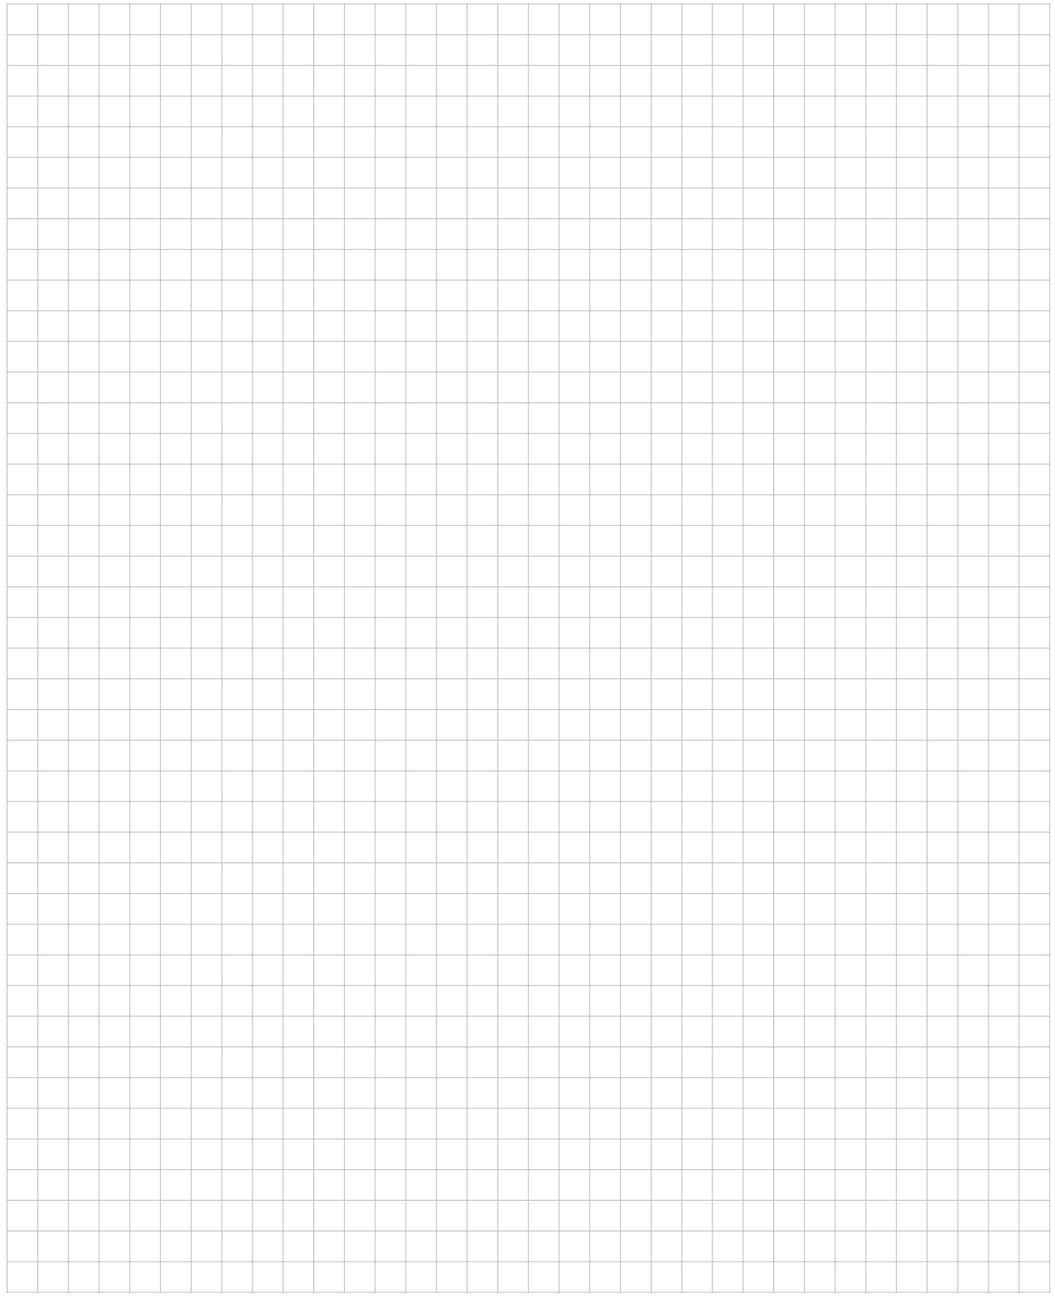
Δp_{v100} (R4..D(K)) Maximum permissible differential pressure for long service life with valve completely open.

Δp_{v0} (R4..D(K)) Maximum permissible differential pressure for long service life with closed valve.

Δp_s Maximum close-off pressure at which the valve can still seal tightly, with reference to the particular leakage class.

p_s Permissible operating pressure





All inclusive.

Belimo as a global market leader develops innovative solutions for the controlling of heating, ventilation and air-conditioning systems. Damper actuators, control valves, sensors and meters represent our core business.

Always focusing on customer value, we deliver more than only products. We offer you the complete product range for the regulation and control of HVAC systems from a single source. At the same time, we rely on tested Swiss quality with a five-year warranty. Our worldwide representatives in over 80 countries guarantee short delivery times and comprehensive support through the entire product life. Belimo does indeed include everything.

The "small" Belimo devices have a big impact on comfort, energy efficiency, safety, installation and maintenance.

In short: Small devices, big impact.

- 5-year warranty
- On site around the globe
- Complete product range
- Tested quality
- Short delivery times
- Comprehensive support
