

A hand is shown pointing upwards, with the index finger touching a glowing node in a complex network of white lines and nodes. The background is a blurred image of a person's face, suggesting a human connection to the technology. The network is composed of various sized nodes, some of which are glowing brightly, creating a sense of dynamic connectivity.

**The best
connection.**

Bus solutions from Belimo

BELIMO®

Integrating, communicating and controlling.

The networking of building technology systems enhances comfort, safety and transparency in air-conditioned buildings. Thanks to this transparency, operation can be optimised and overall energy consumption reduced – just as readily in new systems as in retrofitting or renovation projects. This networking of the individual components can be easily undertaken with bus systems, extending throughout the entire building.

Bus systems can be used to exchange any volume of data from various bus participants over the same physical lines. The user has unrestricted access to control, feedback and parameters on the individual devices. Cabling expenditures are reduced by up to 90% compared with actuators with conventional wiring. The installation work is simpler and, thanks to time and material savings (cables, terminals, connectors, etc.), cheaper too. Further positive selling points for bus solutions include their lower fire load and the fact that they take up less space in cable trays and switch cabinets. Depending on the application and requirements, different bus systems are used.

The best connection.

MP actuators and sensors from Belimo

Directed to all higher-level systems

The MP-Bus® from Belimo was specially developed as a single-client/multi-server bus system for HVAC actuators and sensors. It allows up to eight different final controlling elements to be grouped together and connected to any higher-level system. Gateways and DDC controllers with an integrated MP interface serve as the MP client.

Easy wiring

The MP-Bus® combines supply and communication in just three wires and uses just one simple installation cable. It is very resistant to external interferences and does not need bus terminations.

The right actuators for every application

Multifunctional MP and communicative MPL actuators from Belimo are suitable for the integration of the final controlling elements in the MP-Bus®. These are available as rotary, full-rotation and linear actuators for a very wide variety of damper types and volumetric flow units. Also available is the wide array of MP-Bus-capable motorised valves – ranging from characterised control valves through butterfly valves and globe valves all the way to the intelligent Belimo Energy Valve™ with built-in web server for energy monitoring.

Modbus actuators and sensors from Belimo

Used all over the world

Modbus is a communication protocol, which has become a de-facto standard, is used commonly all around the globe and in a huge range of applications. Its simple implementation makes Modbus very popular with many manufacturers.

Direct connection to Modbus RTU & TCP

The RS-485 interface installed in the Modbus devices enables the direct connection of the HVAC final controlling elements to Modbus RTU. Up to 32 actuators can be connected to a Modbus line. Modbus TCP is very similar to RTU, but TCP/IP packets are used to transmit the data. Communication takes place on the IP network.

Ready-to-connect for equipment manufacturing

The Modbus actuator can be provided with an RJ12 socket for the cabling of devices with a compact structure (e.g. air handling units). This actuator version permits rapid, error-free wiring.

Utilise the advantages.

BACnet actuators and sensors from Belimo

Interoperability with BACnet

BACnet is a proven, commonly used communication protocol for building automation. The standard is open, requires no licence and is used by a large number of international providers, universities and associations. Implementing the BACnet Standard Device Profiles B-ASC and B-SS as well as the associated BACnet Interoperability Building Blocks guarantees genuine compatibility between various BACnet devices.

BACnet IP and MS/TP

BACnet distinguishes between MS/TP and IP. BACnet MS/TP can be realised with a serial interface in the actuator. An Ethernet interface is used to connect to BACnet IP. The Belimo Energy Valve™, for example, can be integrated directly in the BACnet IP network.

KNX actuators from Belimo

KNX-certified actuators

KNX is a well-engineered building automation system used around the world to control systems spanning several building trade groups, such as heaters, blinds and security technology in buildings. The KNX-certified actuators enable a direct connection to the KNX network with a maximum of 64 nodes per line. Communication takes place via the integrated KNX interface (TP, S-Mode).

Product database for ETS

KNX systems are always commissioned using the project planning and commissioning tool ETS. The actuators from Belimo, including the sensor, can be easily configured in the ETS using the available product database, allowing integration errors to be minimised.

Ready for the future.

The IoT ecosystem from Belimo

Easy access to device data

As an integral part of our IoT products, the devices can be connected to the Belimo Cloud and thereby benefit from the possibilities of Belimo's IoT ecosystem. Device data can be read from anywhere via an easily accessible, secure interface – the Belimo Cloud Client API. If required, it can also be controlled via the cloud. This enables third-party providers to easily access data authorised by the customer and offer web services such as energy billing, energy optimisation, building analyses and remote maintenance.

Actuators with an IoT ecosystem

IoT actuators are connected to the Belimo Cloud ecosystem and can therefore be controlled and read via the internet. They also offer two inputs for sensors to transmit actual measured values for temperature, pressure, humidity and air quality to the ecosystem. This eliminates additional I/O connections and enables easy integration of sensor values into the ecosystem.

Simple and low-cost.

Override control and sensor integration included

Conventional sensors can be connected directly to actuators or override control can be realised locally. This allows the costs for planning, installation, operation and maintenance to be minimised.

- A sensor¹⁾ can be connected to many actuators capable of communication. This may be a passive resistance sensor (Pt1000, Ni1000, NTC etc.), an active sensor (e.g. with a DC 0...10 V output) or a switching contact. Its signals are digitised in the Belimo actuator and transferred to the higher-level bus system.
- Using local override control, the actuator can be fully closed or opened and a preset maximum value also approached.

- Closed 0 %
- Max

¹⁾ For sensor compatibility per actuator, see overview list.

²⁾ The function of the key differs depending on the type of actuator.

Structured system integration.

MP connections via Belimo gateways and solutions from third-party suppliers

The Belimo gateways and our MP partner solutions are used to convert the signals of the actuators which are grouped together in the MP-Bus[®] and those of the sensors for the relevant networks. This enables a structured integration of clearly arranged and manageable sub-systems.

Belimo provides the MP specification to interested manufacturers of DDC controllers. They can use these specifications to implement a corresponding hardware/software MP interface in their devices.

Tested MP partner solutions

The close cooperation between the manufacturers of the DDC controllers and Belimo results in solutions of the highest possible quality. The integration solutions for the MP-Bus[®] resulting from the joint development efforts are subjected to a conformity test and awarded the MP-BUS COMPATIBLE label when they pass it successfully.

A current overview of recognised MP partners of Belimo can be found on your local Belimo website.

MP-BUS[®]
MP-BUS COMPATIBLE

Direct connection for dampers, valves and sensors.

Easy integration into fieldbus systems

In cases where the customer wishes to connect a device directly to a higher level network, Belimo provides various actuators with an integrated interface. This enables a direct connection to field buses commonly used for HVAC without additional hardware, which eliminates additional sources of error. The system integrators can integrate the bus devices easily and using a software environment with which they are familiar.

Comprehensive product range

Our range includes actuators and sensors for Modbus, BACnet, KNX and IoT. This range is continuously being expanded. You will find a complete product overview on your local Belimo website.

Practical tools from Belimo.

Simple parameterisation, commissioning and monitoring

As a rule, MP, Modbus, BACnet, KNX and IoT actuators and sensors are shipped from the factory with typical basic settings. Parameters such as running time, angle of rotation, stroke limitations, etc. can also be individually adjusted and customised precisely to the requirements of the respective system.

The Belimo PC-Tool MFT-P and the practical ZTH EU adjustment tool are available as aids for this purpose. Depending on the place of utilisation and the task, they facilitate on-site parameterisation, commissioning, diagnostics and evaluation. Actuators with the NFC function can be parameterised using the Belimo Assistant App via an NFC enabled smartphone or with the assistance of the Bluetooth to NFC converter.

Belimo PC Tool

- Graphical display of setpoint and actual values
- Create and print trend evaluations
- Useful tool for troubleshooting on the MP-Bus®
- Access levels can be defined and managed via release code
- Specialised software for OEMs to make efficient use of the tool in the production process

ZTH EU Service Tool

- The handy ZTH EU Service Tool is connected directly to the actuator for parameterisation
- Reliable and proven connection via the tool socket
- Supply via actuator – always ready
- MP-Bus® tester integrated (packet counter, signal level)
- ZIP level converter to USB for connecting the actuator with the PC Tool

You can find further information about the possible connections of the ZTH EU Service Tool on your local Belimo website.

Practical tools from Belimo.

Belimo Assistant

- Belimo devices marked with the NFC logo can be parameterised using the Belimo Assistant app
- Can be installed on all Android mobile phones and iPhones
- Can be operated with ease using the smartphone's touch display
- The actuator can be parameterised while de-energised
- Updates are undertaken automatically via the Google Play or Apple App Store

ZIP-BT-NFC Bluetooth to NFC converter

- Allows for simple use of the Belimo Assistant app via Bluetooth with Android mobile phones and iPhones in order to parameterise NFC enabled devices
- Safe to attach to the actuator thanks to countless micro suction cups attached to the bottom

Parameterise with which tool?

Which tool is suitable for which actuator can be simplified as follows:

- All actuators with the endings "-MOD" and "-MP": ZTH EU
- All actuators with the ending "-BAC": Belimo Assistant
- Belimo Energy Valve™: Webserver, Belimo Assistant
- Thermal Energy Meter (22PE-1..): Webserver, Belimo Assistant
- Flow Sensor (22PF-1..): Belimo Assistant
- Room unit, room operating unit (P-22RT-1..): Belimo Assistant
- BKN230-24-MOD: DIP switch

¹⁾ The currently available product range can be found on your local Belimo website.

All inclusive.

Belimo as a global market leader develops innovative solutions for the controlling of heating, ventilation and air-conditioning systems. Actuators, valves and sensors represent our core business.

Always focusing on customer added value, we deliver more than only products. We offer you the complete product range for the regulation and control of HVAC systems from a single source. At the same time, we rely on tested Swiss quality with a five-year warranty. Our world-wide representatives in over 80 countries guarantee short delivery times and comprehensive support through the entire product life. Belimo does indeed include everything.

The "small" Belimo devices have a big impact on comfort, energy efficiency, safety, installation and maintenance.

In short: Small devices, big impact.

5-year warranty

On site around the globe

Complete product range

Tested quality
