

INDOOR AIR QUALITY SERIES

IAQRM SERIES

PRODUCT DESCRIPTION

The IAQ will monitor up to 6 parameters that include Particulate Matter (PM1, PM2.5, PM4 & PM10), Volatile Organic Compounds, Carbon Dioxide, Formaldehyde, Humidity & Temperature and provide either a BACnet® or Modbus signal for connection to a building automation system. The IAQ features field replaceable sensor modules, a full-colour capacitive touch screen LCD that's user configurable, a configurable alarm relay output. All this housed in a new modern, quick mount enclosure.

The IAQ facilitates compliance with ASHRAE 62.1 standard for air quality and contributes toward satisfying the RESET™ Air Standard and Features A08 and T06 under the WELL Building Standard®.

NOTE: This CO₂ sensor incorporates a Self Calibration feature to correct CO₂ sensor drift. This feature is recommended for applications where the CO₂ level will be close to normal (400 ppm) at least one hour per day. If the monitored space is occupied 24 hours or consistently maintains higher or lower levels of CO₂, it is recommended that this feature be turned off, but yearly calibration will be required.

TYPICAL INSTALLATION

For complete installation and wiring details, please refer to the product installation instructions.

The IAQ series can be mounted directly to a single gang electrical box or directly to a wall. The backplate includes many mounting hole configurations to allow for mounting on a variety of electrical boxes.

The IAQ has a screw block terminal provided for connection to the Building Automation System.
